

### Hardware Installation

1. Your computer should be off. Now connect the gaming mouse to any USB port of your PC (it takes a few seconds for your mouse to be properly installed).
2. Turn on your computer.

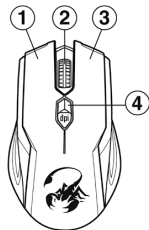

Remark: Do not use the optical/laser mouse on a desk which is made of glass or mirror.

### Software Installation

1. Make sure the gaming mouse is connected to the computer.
2. Download the programmable driver from the Genius website at [www.geniusnet.com](http://www.geniusnet.com)
3. Follow the on screen instructions to complete the software installation.

### Button Assignment

1. **Left Button:** Provides traditional mouse functions such as click, double click or drag.
2. **Middle button:** Press this button to surf the Internet and Windows documents.
3. **Right Button:** You can assign this button to frequently used keyboard and mouse functions.
4. **DPI adjustment:** Default is 1200 dpi. DPI in 400/800/1200/3200 for different needs in the battle field.

### User Interface

1. **Assignment Button:** Assign a preset macro key to each defined button.
2. **Manage Macro:** Edit your own mouse function into one Macro key with delay time when needed.

### HELP

Press  to find out how to use the user interface and the details of each function.
